HEALTH-CARE EMERGENCY

**FUNDACIÓN DEMOCRÁTICA
ITALO AMERICANA, FDIA -
REPRESENTAÇÃO
PERMANENTE is a non-
governmental humanitarian
organization focused on
providing health care and
assistance to people in all
parts of the world especially in
the African continent where the
right to healthcare is not
accessible in some rural
villages.**

HEALTH-CARE EMERGENCY

The professionalism of doctors, pharmacists, nurses, laboratory technicians to that of communication and awareness experts. The campaign is strongly rooted in experience in the field and in research and development laboratories: it is the lack of life-saving drugs, experienced by our doctors at a local level, that gives impetus to pressure and awareness at an international level.

HEALTH-CARE EMERGENCY HUMANITARIAN HELP

Access to medicines and good healthcare is widely recognized as a fundamental human right. The **Universal Declaration of Human Rights (UDHR)**, in **Article 25**, states that “everyone has the right to a standard of living adequate for the health and well-being of himself and of his family, including food, clothing, housing, and medical care.”

Additionally, the **International Covenant on Economic, Social, and Cultural Rights (ICESCR)**, in **Article 12**, recognizes “the right of everyone to the enjoyment of the highest attainable standard of physical and mental health.” This includes access to essential medicines, healthcare services, and the prevention and treatment of diseases.

Many global associations, such as the **FUNDACIÓN DEMOCRÁTICA ITALO AMERICANA, FDIA - REPRESENTAÇÃO PERMANENTE** advocate for universal health coverage (UHC) to ensure that all individuals receive the healthcare they need without suffering financial hardship.

FDIA-NGO HUMANITARIAN HELP

Orphan drugs are medicines intended for the diagnosis, prevention and treatment of rare diseases, defined as such in Europe if they affect less than 5 people per 10,000 inhabitants. Their production is complex and expensive, often unprofitable for pharmaceutical companies, making access difficult for patients. ©

The aim of this feasibility study is to analyze how the FUNDACIÓN DEMOCRÁTICA ITALO AMERICANA (FDIA) - REPRESENTAÇÃO PERMANENTE can contribute to improving access to orphan drugs for people with rare diseases.

2.. Role of FDIA in Supporting Orphan Drugs

FDIA, as a humanitarian association, can play a key role in facilitating access to orphan drugs through humanitarian aid:

3.1 Support for Research and Development

Promotion of fundraising initiatives to finance clinical studies and trials. Support for innovative projects based on advanced biotechnologies such as gene therapy, immunotherapy and nanotechnology.

Creation of partnerships with pharmaceutical companies, universities and research centers for the supply of new orphan drugs.

3.2 Patient Assistance

Creation of information desks to support patients in navigating the bureaucratic procedures for accessing orphan drugs.

Collaboration with health organizations to ensure the free or subsidized provision of these drugs to patients in disadvantaged economic conditions.

Creation of a digital platform to connect patients, doctors and institutions.

3.4 Creation of a Support Fund

Establishment of a humanitarian fund to cover the costs of access to medicines for less well-off families.

Sponsorship of telemedicine programs to improve monitoring and follow-up of patients.
